

Policy Data Asset Governance Framework

Insurance | Detailed portfolio case study | Synthetic data

Executive summary

Mapped consumer needs to source attributes and created recommendations for dictionary, scope and stewardship.

180 attributes reviewed	6 consumer teams	42 unused fields	28 definition gaps
----------------------------	---------------------	---------------------	-----------------------

Business challenge

Consumers lacked a clear view of available attributes, downstream usage and ownership.

Solution architecture

	■■■■■■■	● ● ● ○	▲ 12%	Status: Review

Illustrative dashboard wireframe. Values are synthetic.

Delivery approach

Inputs	Data asset, Consumer extracts, Data dictionary, Stakeholder input
Technology	SQL, Power BI, Confluence
Deliverables	• Attribute inventory • Consumer mapping • Gap assessment • Dictionary updates • Ownership matrix

Key considerations

The design prioritises traceability, clear definitions, appropriate human review, data quality and proportionate monitoring. Any production implementation would require validation against the organisation's data, operating model, policies and applicable requirements.

Portfolio note

This document uses generated data and representative scenarios. It contains no client-confidential information and does not make claims about actual production outcomes.
