

Monitoring & Evaluation Analytics Framework

Public Health | Detailed portfolio case study | Synthetic data

Executive summary

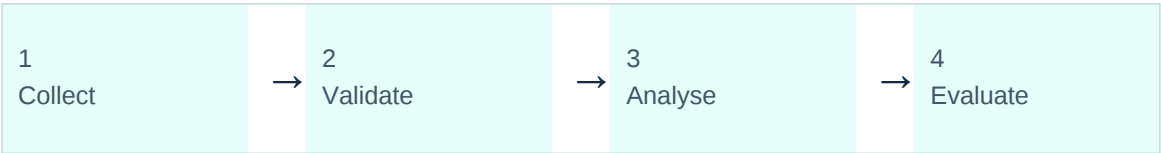

Designed an indicator model, quality checks and reporting views for outputs, outcomes and facility trends.

45 indicators	30 sites	24 months	94% reporting completeness
------------------	-------------	--------------	-------------------------------

Business challenge

Programme teams needed consistent indicators and evidence across multiple reporting locations.

Solution architecture

Dashboard mockup

PORTFOLIO DASHBOARD	45	30	24	94%
	indicators	sites	months	reporting completeness
	■■■■■	● ● ● ○	▲ 12%	Status: Review

Illustrative dashboard wireframe. Values are synthetic.

Delivery approach

Inputs	Programme records, Survey data, Facility reports, Targets
Technology	Power BI, Python, SQL
Deliverables	• Indicator reference • Quality checks • M&E; dataset • Performance dashboard • Evaluation brief

Key considerations

The design prioritises traceability, clear definitions, appropriate human review, data quality and proportionate monitoring. Any production implementation would require validation against the organisation's data, operating model, policies and applicable requirements.

Portfolio note

This document uses generated data and representative scenarios. It contains no client-confidential information and does not make claims about actual production outcomes.
