

Responsible AI Impact Assessment Framework

Cross-industry | Detailed portfolio case study | Synthetic data

Executive summary

Designed a structured assessment covering data, fairness, transparency, privacy, safety and oversight.

7 risk domains	48 assessment questions	4 risk tiers	15 control patterns
-------------------	----------------------------	-----------------	------------------------

Business challenge

AI teams needed a consistent method to identify affected stakeholders, harms and required controls.

Solution architecture

	risk domains	assessment questions	risk tiers	control patterns
	■■■■■■■	● ● ● ○	▲ 12%	Status: Review

Illustrative dashboard wireframe. Values are synthetic.

Delivery approach

Inputs	Use-case intake, Model documents, Data evidence, Stakeholder review
Technology	AI Governance, Risk Assessment, Policy
Deliverables	• Intake form • Risk scoring • Control library • Decision record • Review guidance

Key considerations

The design prioritises traceability, clear definitions, appropriate human review, data quality and proportionate monitoring. Any production implementation would require validation against the organisation's data, operating model, policies and applicable requirements.

Portfolio note

This document uses generated data and representative scenarios. It contains no client-confidential information and does not make claims about actual production outcomes.
