

AI Governance Metrics Dashboard

Enterprise AI | Detailed portfolio case study | Synthetic data

Executive summary

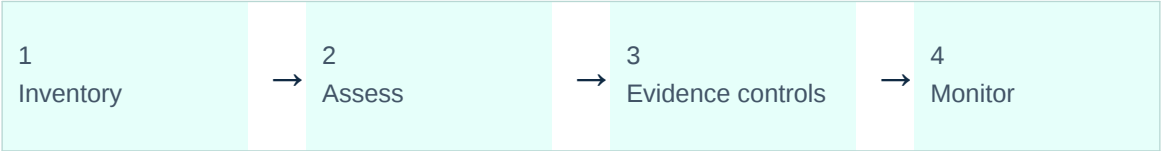

Designed governance KPIs linked to evidence, ownership, exceptions and remediation status.

36 AI systems	82% controls evidenced	7 high-risk reviews	14 actions overdue
------------------	---------------------------	------------------------	-----------------------

Business challenge

Leaders lacked portfolio-level visibility of reviews, controls, incidents and overdue actions.

Solution architecture

PORTFOLIO DASHBOARD	36	82%	7	14
	AI systems	controls evidenced	high-risk reviews	actions overdue
	██████	● ● ● ○	▲ 12%	Status: Review

Illustrative dashboard wireframe. Values are synthetic.

Delivery approach

Inputs	AI inventory, Risk assessments, Control evidence, Incident logs
Technology	Power BI, AI Governance, Data Quality
Deliverables	• Governance data model • KPI definitions • Portfolio dashboard • Action tracker • Executive report

Key considerations

The design prioritises traceability, clear definitions, appropriate human review, data quality and proportionate monitoring. Any production implementation would require validation against the organisation's data, operating model, policies and applicable requirements.

Portfolio note

This document uses generated data and representative scenarios. It contains no client-confidential information and does not make claims about actual production outcomes.
